1 Hotel and Travel Information

Hotels: (area code = 505)

- Holiday Inn Express 661-1110
- North Road Inn 662-3678
- Orange Street B&B 662-2651
- Hilltop House 662-2441
- Los Alamos Inn 662-7211

All of these are within 1-2 miles to the workshop location, so if you are on foot it is simply a nice walk to and from.

Car Rental Budget does a lot of business with the lab and is in fact the only car rental business in Los Alamos, so any trouble with a rental is most easily resolved if you get a Budget car. IMPORTANT: the Lab does not pay or the insurance (which is robbery anyway) ...

Air Flights While it is possible to fly into Santa Fe, I recommend flying into Albuquerque and renting a car for whatever group you are coming with. If anyone is really averse to driving a car, let us know and we will explore the options. (I know that at least one of the shuttle companies was put out of business by scandal and accidents.)

Shuttle We recommend renting a Budget Car in Albuquerque, but another option is the Sandia Shuttle from Albuquerque to Santa Fe and then a Lab taxi from Santa Fe to

Los Alamos. The Sandia Shuttle URL is:

<http://www.sandiashuttle.com/>

and the Lab Taxi will be arranged by Rod Garcia (rgarcia@lanl.gov, 505-667-1444). The cost for a trip from Albuquerque to Santa Fe (one way) is 23\$ per person. The cost for the Santa Fe to Los Alamos leg is quite steep, $\approx 120\$$, but the costs are for the entire van – it is the same whether there is one person or an entire van full (14 passengers). **IMPORTANT: If you are planning on using the lab taxi you should ask us to schedule if for you and add the cost to the registration fee BY 11/26/2002 due to the holiday.**

2 Parking

We will have parking permits for all registered participants for the Research Park parking lot (Motorola building). This lot always has parking spots. (This is an issue at the Lab with all the construction, for those of you not from the lab)

If you have not received one via email by Tuesday 11/26/2002, contact Rod Garcia (rgarcia@cnls.lanl.gov) and you will be sent a pdf file to print and stick on the dashboard of your car, or alternatively one can be picked at the workshop on the morning of 12/2/2002.

3 Poster Session Information

Contributions are invited for a poster session to be held on the Tuesday evening from 6-10 p.m. All contributed presentations (as well as some of the invited presentations) will be presented at this poster session, which will include a buffet style dinner, hors d'oeuvres, desserts, and drinks. We are actively recruiting posters from all LANL groups which have an interest in image data or image-like data. We especially encourage those teams with interesting data and particularly challenging analysis problems to present their data and the challenges. We expect that this session will generate collaborations between teams with data, teams with advanced analysis capabilities, and external researchers.

- Each poster will have approximately 4 feet by 4 feet of space. Arrangements can be made to have 2 such spots side by side.
- *We will accept late poster submissions: at least until 11/25/2002!!*

4 Deadlines and Registration Fees

- Extended: Submission of abstracts for the poster session: 25 November 2002
- Extended: Registration for the short courses: 25 November 2002
- Extended: Pre-registration via the web: 20 November 2002
- Pre-registration via the webpage will cost \$100.00.
- The fee for registration at the workshop will be \$140.00
- (The registration fee will be waived for students and postdocs, though postdocs and students at the Lab should request that their group pay the registration fee.)

5 Audio-Visual Information

We will have the usual AV equipment: Overhead projector and laptop projector.

6 Maps

Maps of the town:

<http://visit.losalamos.com/maps/LosAlamos-print.gif>

<http://visit.losalamos.com/maps/losalamos.pdf>

More maps:

<http://visit.losalamos.com/maps/>

Directions: Head south on Diamond drive (see map above) until you cross the Omega bridge (the only significant bridge in town) and take an immediate right onto West Jemez Road immediately after the fire station take a right (The Motorola building will be on the corner) and this road turns into the Research Park parking lot. Please use the parking spots

beyond the one hour spots which should be left open for short-term visitors. The Workshop will be held in the conference room on the 2nd floor of the Motorola building. There will be signs.
